

## GOLD

This regal color imbues a Christmas tree with a certain radiance and brilliance that's echoed throughout the house. With 24-karat shine, there's no need to overdo the adornments in the rest of the room. Just add fruit, berries, or greenery.

▲ **ADD A DECORATOR'S TOUCH** to classical interiors by sticking with Christmas balls in two colors—rich gold and red. Black ribbons on the packages convey formality and echo the black-painted window trim.

► **CREATE CLASSIC RADIANCE** with silver, clear, and gold ornaments. A light dusting of white paint on the pinecones mimics snow. Wrap packages with mismatched papers and ribbons for a casual look.
